SCIENCE AND TECHNOLOGY
A PURCHASE GUIDE FOR BRANCH AND PUBLIC LIBRARIES
1977

This classified and annotated list contains 1000 titles, more or less, which have been selected for the student and non-specialist adult from books received in the Science and Technology Department of the Carnegie Library of Pittsburgh during the year 1977.

The entries carry the name of the first author only, title, and bibliographic information which includes price when readily available. When the term "photo" is used in the collection, it indicates some illustrations are colored photographs. To facilitate ordering catalog cards, the Library of Congress number is given.

Entries are classified in the Library of Congress system. Foreign publications, textbooks, symposia, proceedings and transactions are included only if of broad general interest.

To answer the increased public demand, many do-it-yourself books have been added to the collection. Series, examples of which are included in this bibliography, should be noted.

Example: Day, Richard
How to Build Patios and Decks.
Times Mirror Books, Publisher

Super Sewing Series.
